<p>Info 2</p>	<p>The European Union (EU) is a political and economic union of 27 European countries. The EU was established to promote economic cooperation and political integration among its member states.</p> <p>As a citizen of Germany, imagine the following scenario: you are asked by your national government to evaluate new reform proposals that have been created to coordinate rules on the EU level. The proposals will be evaluated according to a range of criteria, which will come up in the following questions. The government is interested in your opinion about each criteria.</p>	<p>Info box</p>
